

This model represents the revoked refresh token of a user								
It is used when a user refreshes access token. It automatically revokes the old refresh token. Prevents usage of the old refresh to request for new access token								
datetime_ttl (time-to-live) will be used to remove the row from database								
<b>RevokedToken Model (user_authid)</b>								
id	bigint	primary key						
value	Text							
datetime_ttl	datetime	utc						
datetime_created	datetime	utc
