

This model represents the revoked refresh token of a user							
It is used when a user refreshes access token. It automatically revokes the old refresh token. Prevents usage of the old refresh to request for new access token							
datetime_ttl (time-to-live) will be used to remove the row from database							
<b>RevokedToken Model (revoked_token)</b>							
id	bigint	primary key					
value	Text						
datetime_ttl	datetime	utc					
datetime_created	datetime	utc
